# Marine Ecosystem Critical Issues: Case Studies

You will analyze case studies for two different marine protected areas. Use the charts below to record your observations and summarize the important components of each case study.

## Case Study #1: Apo Island, Philippines

<b>Geographic location</b>	
<b>Marine ecosystem or habitat types</b>	
<b>Important marine species</b>	
<b>Human uses</b>	
<b>Human impacts/ threats</b>	
<b>Goals of the MPA</b>	
<b>Stakeholders affected by the MPA</b>	
<b>Outcomes (positive results) from creating the MPA</b>

# Marine Ecosystem Critical Issues: Case Studies, continued

## Case Study #2: Galápagos Marine Reserve, Ecuador

<b>Geographic location</b>	
<b>Marine ecosystem or habitat types</b>	
<b>Important marine species</b>	
<b>Human uses</b>	
<b>Human impacts/ threats</b>	
<b>Goals of the MPA</b>	
<b>Stakeholders affected by the MPA</b>	
<b>Outcomes (positive results) from creating the MPA</b>
