

Fossil Fuel Tridiagram

1. In your notebook draw a tridiagram (A venn diagram with 3 overlapping circles).
2. Label each one Oil, Natural Gas or Coal
3. Place the following statements in the corresponding boxes
 - forms from organic matter buried beneath sediments
 - changed by high pressures and temperatures
 - exists mostly as a solid
 - exists mostly as a liquid
 - exists mostly as a gas
 - forms mostly from plant matter
 - forms mostly from microscopic animals
 - releases energy when burned
 - pollutes the environment when burned
 - nonrenewable resource
 - formed in swamps
 - formed in oceans
