

Unit 7 Study Guide: Human Impact

1. What is a carbon footprint?
2. What are some ways to reduce your carbon footprint?
3. What is biodiversity? What are the three kinds?
4. Why is biodiversity important?
5. What does HIPPO stand for? Provide an example of each letter.
6. What number is the human population quickly reaching?
7. What is biomagnification?
8. What is bioaccumulation?
9. What are some substances that will biomagnify?
10. What is the significance of the Crown of Thorns Starfish?
11. Why do we care about the California Condor? What was causing it to die?
12. What does MPA stand for? What is their purpose?
13. What is sustainable seafood? How can you determine if something is sustainable?
14. How is global warming different from climate change?
15. What are things that are NOT responsible for global warming?
16. What are some examples of climate change?
17. What are greenhouse gases?
18. Which greenhouse gas has the most influence on climate? Why does it have this influence?
19. How does carbon dioxide get into the atmosphere?
20. How does methane get into the atmosphere?
