

What relationship examples can you think of?

Using what you know about Yellowstone's ecosystem complete the following on the inside of the back cover of your pamphlet.

Think of at least 3 examples of species interacting in Yellowstone, and explain:

- What type of interaction/relationship it is
- What each organisms role in the relationship is
- Whether each organism is harmed, benefitted, or neither

ON THE FRONT OF YOUR BOOKLET

- Create a Cover Page
- It should have a title that describes the activities in it (something to do with Ecology and Yellowstone)
- It should have a **fully colored** picture that incorporates at least **3** of the topics we have discussed.
